Dear Pat FName :

**Your Artificial Sphincter Placement is scheduled at:**

on

**The hospital/surgical center will notify you of your arrival time for your procedure.**

Your pre-surgical testing is scheduled for at your/the .

Artificial sphincter is a surgical procedure that involves the insertion of a prosthesis to control urination.

## **PREPARING FOR SURGERY: THINGS YOU SHOULD KNOW:**

1. You will be admitted to the hospital the day of your surgery. You will spend about 24 hours in the hospital after your procedure.
2. If you are on **Coumadin, Plavix, or Aspirin** for coronary stents, you **must consult your Cardiologist or Primary Care Physician** for management and proper discontinuation of drug prior to your surgery. If you are on **Aspirin or Aspirin Products** for preventative measures, or drugs for **Arthritis or Inflammation**, please discontinue one week before the procedure. If you are on **Herbal Supplements** (anything that is not prescribed by a physician), please discontinue one week before the procedure.
3. If you take blood pressure, thyroid, or seizure medication, **please follow the instructions given to you at your Pre-Operative appointment on how to take these the day of your procedure.**
4. No eating or drinking after midnight the night before your surgery except for blood pressure or other medications as mentioned above.
5. No alcohol 24 hours prior to surgery.
6. You will be receiving anesthesia for your procedure and will meet with an anesthesiologist prior to surgery. **You are unable to drive, drink alcohol or sign legal documents for 24 hours after receiving anesthesia.**

## **RECOVERING FROM SURGERY: WHAT TO EXPECT:**

1. You will awake from surgery with a catheter in your urethra, which drains urine from your bladder. This allows your urinary tract to rest and recover. The catheter will be removed before your discharge. The physicians and nurses will explain all this during your hospital stay. Once you get

home, You may experience burning on urination due to the Foley catheter insertion during surgery. This will resolve in several days.

2. You will go home with the sphincter deactivated, so you will notice no change in urination. Your sphincter will be activated in 6 weeks.

3. **If you experience auto-inflation of the device during the first six weeks, please call the office at (585)232-2980**

## **INSTRUCTIONS: POST ARTIFICIAL SPHINCTER**

**DIET:**

1. It is okay to eat or drink whatever you want.
2. We encourage you to increase your fluid intake.

**ACTIVITY:**

1. It is okay to shower. **No bathing** until seen by the doctor.
2. It is okay to climb stairs when discharged from the hospital.
3. Walking is good exercise, which improves circulation. Do not over do it! Go easy at first and slowly increase the distance, as you feel better.
4. Avoid any heavy lifting or strenuous exercise for at least 4-6 weeks as directed by your physician.

**DRIVING:** **No driving for 3-5 days after the procedure.**

**MEDICATIONS:** Please refer to the surgery medication list provided.

**INCISION SITE:** Observe the incision daily. Some redness and drainage at the incision site is normal. If you notice any increased redness, increased tenderness, purulent (puss like) drainage from the incision, and/or develop fever and chills, **please call the office at (585)232-2980.**

**SEXUAL ACTIVITY:** **No sexual activity for 6 weeks.**

**BOWELS:** One should avoid straining during a bowel movement. You may be given a stool softener to promote regular bowel movements, or you may elect to use Metamucil, or add fruits and vegetables to your diet. Milk of Magnesia 30 cc is recommended if your stools are hard or if you feel constipated.

**FOLLOW-UP:** Your follow up appointment is scheduled for N DShort at N Time in our N Loc Name office.

**Please note:** You will need to report to the office 10 minutes prior to your scheduled appointment time.

**If you have any questions or concerns, please call us at (585)232-2980.**
